Spirits Distribution Intelligence

Real-Time Sales & Inventory Analytics Dashboard

Pushpal Kawara | Data Analyst & BI Specialist

pushpalanalytics@gmail.com

What Problem Are We Solving?

Three critical gaps holding beverage distributors back from smarter, faster decisions.

Data Silos

Sales data is scattered across multiple Excel sheets — no single source of truth exists.

Delayed Insights

Decision-makers rely on outdated reports instead of real-time daily metrics.

Margin Leakage

No clear visibility into discount impacts, slow-moving inventory, or outlet profitability.

Business Questions Answered

1

Brand Profitability

Which brands drive true profit — and which leak margin through heavy discounts?

2

Outlet Performance

Which retail outlets and bars deliver the highest net profit?

3

Stock Management

Which products face stock-out risks and need immediate reordering?

4

Sales Seasonality

What are the weekly and monthly demand patterns across the business?

Data Engine & Star Schema Model

A robust, scalable architecture built for speed and accuracy.

- **Central Fact Table:** Sales_Transactions tracking volume, revenue, and discounts.
- **Dimension Tables:** Product_Master, Outlet_Master, Date, Inventory_Report.
- **Tech Stack:** Python → SQL Server → Power Query → Power BI.
- **Result:** Fast query speed, 100% data accuracy, and easy scalability.

Brand Profitability & Discount Impact

Key Finding

Identified 4 high-revenue brands leaking net margins due to discounts exceeding 8%.

Action Plan

Cap maximum discount rates per brand to safeguard overall profitability and protect the bottom line.

Channel & Outlet Efficiency

Retail outlets consistently outperform bar locations on net profitability — a clear signal to prioritize retail channel investment.

₹83,080

Top retailer revenue — Wine Shop K Block

+55%

Higher net profit margin from retail vs. bar channels

Inventory Valuation & Reorder Alerts

Stock Alerts

4 critical low-stock items identified — requiring ₹1.2L in reorder capital to prevent stock-outs.

Capital Optimization

Prevents working capital from getting locked in slow-moving stock, freeing cash for high-turnover products.

Sales Patterns & Time-Series Analysis

Understanding demand seasonality allows smarter staffing, ordering, and promotional planning.

40% Drop

Mid-week sales (Mon–Thu) fall sharply compared to weekend surges.

Action Plan

Launch targeted mid-week promotions to smooth demand and balance inventory flow.

How I Can Help Your Organisation

Focus High-Margin Channels

Prioritise retail outlets delivering +55% profit margin over lower-performing channels.

Enforce Discount Caps

Set maximum 8% discount limits per brand to protect net profitability.

Automate Reorder Triggers

Prevent stock-outs with automated inventory alerts and reorder workflows.

What I Can Build For You

Interactive Business Intelligence

Custom Power BI, Tableau & Looker Studio dashboards.

Advanced Data Analytics & Modelling

SQL Server, Star Schema architecture, and Power Query ETL.

Python Automation

Automated data cleaning, web scraping, and custom reporting scripts.

Spreadsheet Solutions

Dynamic Excel/Google Sheets models and Apps Script automation.
